

VINEET PANDEY

Full Stack Developer — C++ Programmer

+91 7819066874 vp1246194@gmail.com vineetpandey vineet358

Summary

Full Stack Developer and **C++ Programmer** with hands-on experience on building web applications. Designed and implemented scalable features, optimized backend processes, and REST APIs. Solved **200+ DSA problems**, strengthening algorithmic depth and coding efficiency.

Education

Graphic Era Hill University

Bachelor of Technology in Computer Science | 8.37 GPA

Aug 2023 – May 2027

Bhimtal, Uttarakhand

ABM Senior Secondary School

Intermediate | 91.33%

Jul 2023

Haldwani, Uttarakhand

ABM Senior Secondary School

Matriculation | 98.2%

Jul 2021

Haldwani, Uttarakhand

Projects

🔗 HunarBazaar - E-Commerce | React.js, Tailwind CSS, FastAPI, MongoDB, C++, scikit-learn, Docker Jan 2025

- Designed a **premium multilingual e-commerce platform** connecting local artisans and established brands via integrated buyer-seller-agent-admin workflows, supporting secure and scalable operations.
- Built a **FastAPI-based backend** featuring AI-driven sales insights, inventory control, and personalized recommendations, incorporating AES-128 QR encryption for secure delivery tracking and role-based access.
- Optimized backend and rendering pipelines to achieve an average **server latency of 123.85 ms** and a **speed index of 2.34 ms**, improving transaction efficiency and user engagement.

🔗 Disaster Management System | React.js, CSS, Flask, FastAPI, MongoDB, scikit-learn, pandas, NumPy May 2025

- Developed a **dual-portal disaster management platform** for 500+ civilians and emergency response officials, enabling **instant alerts**, **real-time notifications**, and **coordinated disaster relief operations**.
- Integrated GeoLocation, OpenWeatherMap, and OpenStreetMap APIs, improving situational accuracy by 35%.
- Designed a resource distribution engine optimizing relief allocation reducing emergency response time by 40%.

🔗 SEWA: Smart Food Redistribution Platform | React.js, CSS, Node.js, Express.js, MongoDB Oct 2025

- Engineered a **role-based food redistribution platform** connecting hotels, NGOs, and administrators, enabling secure food listing, request handling, and coordinated redistribution workflows.
- Built a modular multi-role interface supporting hotels, NGOs, and admins with structured dashboards and controlled access for efficient food donation operations.
- Optimized backend workflows and database design to improve system efficiency and data handling.

Technical Skills

Programming Languages: C++, Python, JavaScript, C

Web & Backend Technologies: React.js, Angular, Node.js, Express.js, REST APIs, HTML, CSS

Databases: MongoDB, MySQL

Development Tools: Postman, Vercel, Render

DevOps & Platforms: Git, GitHub, CMake

Relevant Coursework

- | | | |

Achievements & Extracurriculars

- Awarded **Student of the Year** in Class 12 for outstanding academic performance, leadership, and active involvement in sports, debates, and house captainship.
- Solved **200+ Data Structures & Algorithms problems** across LeetCode and GeeksforGeeks
- Led diverse teams in the end-to-end development of projects including **HunarBazaar**, **Disaster Management System**, and **FlowPilot**, demonstrating strong leadership, team coordination, and collaborative execution.
- Participated in **4+ hackathons**, building functional prototypes and collaborating across teams to solve real-world problems.
