

VINEET PANDEY

Full Stack Developer — C++ Programmer

+91 7819066874 vp1246194@gmail.com vineetpandey vineet358

Summary

Full Stack Developer and **C++ Programmer** with hands-on experience building web applications. Designed and implemented web application features and REST APIs. Solved **450+ DSA problems**, strengthening algorithmic depth and coding efficiency.

Education

Graphic Era Hill University

Bachelor of Technology in Computer Science | 8.45 GPA

Aug 2023 – May 2027

Bhimtal, Uttarakhand

ABM Senior Secondary School

Intermediate | 91.33%

Jul 2023

Haldwani, Uttarakhand

ABM Senior Secondary School

Matriculation | 98.2%

Jul 2021

Haldwani, Uttarakhand

Projects

SEWA: Smart Food Redistribution Platform | React.js, CSS, Node.js, Express.js, MongoDB, RAG Feb 2026

- Engineered a **role-based food redistribution platform** connecting hotels, NGOs, and administrators, enabling secure food listing, request handling, and coordinated redistribution workflows.
- Integrated a **RAG-based assistance module** for context-aware responses to user queries.
- Implemented **REST APIs and MongoDB data models** for food listings, donation requests, pickup coordination, and role-based workflows, along with a **real-time hotel-NGO chat system and complaint management module** to support communication and issue resolution.

HunarBazaar - E-Commerce | React.js, Tailwind CSS, FastAPI, MongoDB, C++, scikit-learn, Docker May 2025

- Designed a **premium multilingual e-commerce platform** connecting local artisans and established brands via integrated buyer-seller-agent-admin workflows, supporting secure and scalable operations.
- Contributed to a **FastAPI-based backend** featuring AI-driven sales insights, inventory control, and personalized recommendations, incorporating **AES-128 QR encryption** for secure delivery tracking and role-based access.
- Implemented **role-based frontend interfaces** for buyer, seller, agent, and admin portals.

Saarathi: Disaster Management System | React.js, CSS, Flask, FastAPI, MongoDB, scikit-learn, NumPy Jan 2025

- Developed a **dual-portal disaster management platform** for 500+ civilians and emergency response officials, enabling **instant alerts, real-time notifications, and coordinated disaster relief operations**.
- Collaborated on integrating ML-based resource predictions into the disaster management workflow to support emergency resource planning.

Technical Skills

Programming Languages: C++, JavaScript, C

Web & Backend Technologies: React.js, Node.js, Express.js, REST APIs, HTML, CSS

AI & GenAI: RAG

Databases: MongoDB, SQL

Development Tools: Postman, Vercel, Render

DevOps & Platforms: Git, GitHub,

Relevant Coursework

- Data Structures and Algorithms
- Object-Oriented Programming
- Full Stack Web Development
- Software Engineering
- Database Management
- Artificial Intelligence
- Computer Networks
- Machine Learning

Achievements & Extracurriculars

- Awarded **Student of the Year** in Class 12 for outstanding academic performance, leadership, and active involvement in sports, debates, and house captainship.
- Solved **450+ Data Structures & Algorithms problems** across LeetCode and GeeksforGeeks
- Participated in **7+ hackathons**, building functional prototypes and collaborating across teams to solve real-world problems.
